Engagement Closeout Report

Engagement ID: eng-01

Client: Gulf Union Bank

Client profile: Tier-1 GCC retail bank

Sector / domain: core banking

Region: GCC

Delivered: 2025

Team size: 14 people

Duration: 11 months

1. The Challenge

The legacy core banking platform could not support real-time payments, and end-of-day batch windows were overrunning into business hours.

2. Our Approach

A phased migration from the legacy core to a modern event-driven platform, run as a shadow migration so the old and new systems processed in parallel until cutover.

3. Technology

Java, Spring Boot, Kafka, PostgreSQL

4. Outcomes

- payment latency reduced 45%
- batch window shortened from 6 hours to 90 minutes
- zero unplanned downtime during cutover
